Allot Traffic Management Solution Selected by Broadband Provider in Japan

February 16, 2021

Allot expands their presence in Japan, replacing communication provider's existing system with Allot SmartTraffic QoE solution.

Hod Hasharon, Israel, Feb. 16, 2021 (GLOBE NEWSWIRE) -- [Allot Ltd.](#) (NASDAQ: ALLT) (TASE: ALLT), a leading global provider of innovative network intelligence and security-as-a-service (SECaaS) solutions for communication service providers (CSPs) and enterprises, today announced that their SmartTraffic QoE solution has been selected by a broadband provider in Japan. The solution, which provides comprehensive network traffic analytics plus flexible, granular and precise real-time traffic management, will be implemented to ensure fair use of network bandwidth for all of the provider's broadband customers. With this deal, Allot replaces an existing solution from a competing vendor, further expanding its presence in Japan.

The SmartTraffic QoE solution from Allot utilizes Allot's Dynamic Actionable Recognition Technology to identify different types of encrypted traffic. It prioritizes critical applications over those that hog bandwidth based on Key Quality Indicators (KQIs). Using those KQIs, network traffic is dynamically shaped to ensure that heavy users do not negatively impact the Quality of Experience (QoE) of regular customers.

The Japanese broadband provider required a modular and flexible high bandwidth solution. The [SmartTraffic QoE](#) solution from Allot will be implemented with the capacity to manage up to 1Tbps of traffic which makes it possible to deal with the heavy traffic load and provide accurate QoS enforcement for the communications provider's consumer and business customers.

"We, at Allot, share a pride in customer satisfaction with our new communications provider customer, and our SmartTraffic QoE solution will help them maintain their strong reputation among their customers," said Oren Coral, Vice President Sales, APAC at Allot. "This is another win that shows we have the tools and the team on the ground to provide the quick response and service that are critical for success in the Japanese market."
