

Allot Partners With Swiftel to Provide DDoS Protection as a Service for Their ISP and Enterprise Customers

October 29, 2018

Pioneering deployment incorporating DDoS and DPI in a cloud scrubbing center

HOD HASHARON, Israel, Oct. 29, 2018 /PRNewswire/ - [Allot Communications Ltd.](#) (NASDAQ: ALLT) (TASE: ALLT), a leading global provider of innovative network intelligence and security solutions for service providers and enterprises worldwide, has partnered with Swiftel Networks, a leading provider of global network and IP transit. Allot will provide Swiftel with a distributed denial-of-service (DDoS) protection solution to offer it as a service across their expansive network of internet service provider (ISP) and enterprise customers.

Allot developed a turnkey DDoS security-as-a-service solution that provides an additional opt-in layer of protection on top of the existing transit link services purchased from Swiftel Networks. This solution is groundbreaking as it provides DDoS and deep packet inspection (DPI) in a cloud scrubbing center. Revenues from the security solution will be shared between the two companies.

DDoS attacks have grown exponentially over the past year. To combat this phenomenon among its customer base, Swiftel teamed up with Allot. "We were looking for the perfect match – a vendor who would work as a true partner of Swiftel – to provide product simplicity, accuracy and scalability. After testing several vendors' capabilities, we found Allot to be the only vendor that has both DPI and DDoS protection with the fastest mitigation working in both directions," says Ahad Aboos, Head of Global Infrastructure, Cloud and IoT at Swiftel. "Our customers will have the same level of innovation, and accessibility they've come to rely on us for, but with an added layer of security, and more choice for providers and agents to build, grow, and profit with Swiftel Global Network."

To create this solution specifically for Swiftel, Allot incorporated its DDoS Secure solution for mobile, fixed, and cloud service providers with an added DPI and root cause intelligence. Swiftel customers and partners will benefit from detailed attack forensics and analytics to treat the root cause of misbehaving endpoints. They will also benefit from the solution's ability to rapidly mitigate volumetric DDoS attacks and neutralize outbound threats before they affect network service and business continuity. The solution allows Swiftel and its customers to be aware of their transit utilization and quality of experience while DDoS is being mitigated.

"Placing a scrubbing center with both DPI and DDoS functionality in the cloud is revolutionary. By doing so, Swiftel is poised to truly disrupt the IP Transit market with this Allot-powered DPI and DDoS Secure cloud-based turn-key solution," said Daniel Keidar, VP Solution Architecture and Head of Oceana at Allot. "We are enabling Swiftel to provide a low cost, reliable and secure transit network to their customers."

Forward Looking Statement

This release may contain forward-looking statements, which express the current beliefs and expectations of Company management. Such statements involve a number of known and unknown risks and uncertainties that could cause our future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to: our ability to compete successfully with other companies offering competing technologies; the loss of one or more significant customers; consolidation of, and strategic alliances by, our competitors, government regulation; lower demand for key value-added services; our ability to keep pace with advances in technology and to add new features and value-added services; managing lengthy sales cycles; operational risks associated with large projects; our dependence on third party channel partners for a material portion of our revenues; and other factors discussed under the heading "Risk Factors" in the Company's annual report on Form 20-F filed with the Securities and Exchange Commission. Forward-looking statements in this release are made pursuant to the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
