## **Leading LATAM Operator Safeguards Businesses from Internet Security Threats with Allot WebSafe Business**

**Allot Security-as-a-Service (SECaaS) solutions help operators address business security concerns while delivering recurring revenue opportunities**

HOD HASHARON, Israel, March 16, 2016 /PRNewswire/ --

[Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT) a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience, today announced that a leading communication service provider (CSP) in Latin America providing fixed, mobile and TV cable services, is using [Allot WebSafe Business](#) to power its network-based Security-as-a-Service (SECaaS) offerings to thousands of businesses across the region.

Allot WebSafe Business is a network-based security service protecting mobile and fixed users against a variety of cyber threats. Adding to the growing portfolio of revenue-generating services delivered by the [Allot Service Gateway](#), Websafe Business provides organizations with powerful anti-malware and anti-phishing protection for email and web traffic, content filtering and ad-blocking as well as personalized web filtering services that allow businesses to enforce a corporate policy for safe Internet access.

To complement its SECaaS offerings for businesses, the operator also offers the [Allot ContentProtector](#) solution, providing URL blacklisting for regulatory compliance. The solution operates at the network-level for an additional protection layer to the WebSafe Business deployment.

"This deployment is another example of the increased success of Allot's SECaaS offerings in helping service providers find new ways to better serve their customers and improve profitability," said Gary Drutin, Chief Customer Officer at Allot. "Our network-centric approach provides the most effective protection available today and benefits operators and end-users alike because services can be deployed with no impact to device or battery performance and users enjoy hassle-free setup and maintenance."

### **About Allot Communications**

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience. Allot's flexible and highly scalable service delivery framework leverages the intelligence in data networks enabling service providers to get closer to their customers; to safeguard network assets and users; and to accelerate time-to-revenue for value-added services.
