These non-GAAP measures should be considered in addition to, and not as a substitute for, comparable GAAP measures. The non-GAAP results and a full reconciliation between GAAP and non-GAAP results are provided in the accompanying Tables 2 and 3. The Company provides these non-GAAP financial measures because it believes that they present a better measure of the Company's core business and management uses the non-GAAP measures internally to evaluate the Company's ongoing performance. Accordingly, the Company believes that they are useful to investors in enhancing an understanding of the Company's operating performance.

"Allot continued strong growth in 2011, primarily attributable to its leading position in the mobile market," commented Rami Hadar, Allot Communications' President and Chief Executive Officer. "With video-based applications becoming an ever-increasing challenge for wireline and mobile data networks, we are seeing an increasing number of opportunities throughout Europe, APAC and the Americas. Our Service Gateway provides the broadest and most robust feature set and services for Tier 1 operators. It is a major reason for our being chosen for the largest mobile DPI deployment in the world, which covers both 3G and 4G/LTE topologies."

Recently, the Company achieved the following significant goals:

- During the quarter, received orders from 10 large service providers, 5 of which represented new customers; of these, three new large customers were mobile operators;
- Deepened penetration into a second Tier 1 account in Europe;
- Announced a \$9.5 million order from a Tier 1 wireline account in APAC;
