Allot Releases Advanced Network Analytics Tools Under Single Pane of Glass

Release adds customer experience network metrics dashboards and live monitoring tools to powerful ClearSee network analytics toolkit to enable real-time data-driven decisions

HOD HASHARON, Israel, Sept. 29, 2016 /PRNewswire/ -- Allot Communications Ltd. (NASDAQ, TASE: ALLT), a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience, today announced the expansion of its Allot ClearSee Network Analytics toolkit, to include **ClearSee Network Metrics** and **Real-Time Monitor**, alongside **Network Analytics** and **Self-Service Reporting**, all managed from a newly released **unified business intelligence interface**.

Allot ClearSee Network Analytics software release 14.5 introduces ClearSee Network Metrics with a wide selection of rich interactive dashboards for visibility into bandwidth, consumption and quality of experience (QoE). It also contains Allot ClearSee Real-Time Monitor, providing a live traffic viewing pane within the Allot ClearSee Network Analytics GUI. The Real-Time Monitor tracks network and user usage as it is happening with a 5-second refresh rate and multi-dimensional dashboards. The new software release also features increased scalability, new operation dashboards, improved usability and maintainability, and more.

This powerful combination of tools enables real-time monitoring, self-service analysis, network investigation, and advanced user and QoE analytics, all integrated into a single access business intelligence interface that provides network operators with a unified view to meet their needs for monitoring their network, troubleshooting issues and analyzing their user data. The centralized and unified user interface accelerates the actionability of the insights generated, and maximizes their impact and effectiveness.

"Communication Service Providers and enterprises are under constant pressure to increase the value of their networks to improve profitability and productivity," said Ronen Priel, Vice President Product Management & Marketing at Allot Communications. "The best way to achieve this is by leveraging existing assets, which necessitates deep understanding of the network and user behaviors with advanced, unified analytic tools. Allot's new release directly meets this need."

Allot actionable analytics are field-proven. They have already enabled operators to enhance the offerings they provide to their customers, improve quality of experience and stop revenue leakage by uncovering and reducing fraud.

About Allot Communications

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience.
