Allot Enables Mobile Service Providers to Extend Security Beyond Network Boundaries with Secure Dome

Extending its SECaaS platform capabilities, Allot WebSafe Personal and WebSafe Business now protect broadband users from malware, ransomware and other online security threats anywhere, anytime

HOD HASHARON, Israel, April 27, 2016 /PRNewswire/ --

[Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT), a leading global provider of security and monetization solutions that enable service providers to protect and personalize the digital experience, today announced the Allot Secure Dome, an enhancement to the [Allot WebSafe Personal](#) and [Allot WebSafe Business](#) products. Secure Dome enables service providers offering Security-as-a-Service (SECaaS) to their customers, to extend powerful mobile security protection, such as anti-malware and safe browsing, to users as they cross any mobile, fixed, or Wi-Fi network.

"Allot's WebSafe solutions have been widely adopted and now protect millions of users across the globe," said Yaniv Sulkes, AVP Marketing at Allot. "Allot Secure Dome is a significant value-add for service providers looking to monetize their network-based security solutions, enhance customer loyalty by providing a consistently secure experience, and engage their customers over any network."

According to [recent research](#), one in every thirty mobile browsing transactions poses a security threat and one in every seven mobile app sessions is potentially risky. These vulnerabilities open an opportunity for service providers to position themselves as the protectors of the Internet experience in the digital age. Allot Secure Dome is a new security capability delivered within Allot WebSafe Personal and Allot WebSafe Business, Allot's leading SECaaS platform offerings. The solution enables service providers to deliver consumer, small and medium-sized business (SMB) and enterprise users secure off-net service continuity as they traverse mobile, fixed and Wi-Fi networks. The solution also enables customer engagement and onboarding capabilities which are crucial for gaining service penetration in the mass market.

Allot Secure Dome works by automatically detecting user movement between access zones, enabling service providers to engage users and deliver industry leading protection against ransomware and other forms of malware, as well as URL filtering, regardless of the user's access network. The Allot Secure Dome application can be branded by service providers and is downloadable on the App Store and Google Play.

About Allot Communications

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading provider of security and monetization solutions that enable service providers to protect and personalize the digital experience. Safe Harbor Statement

This release contains forward-looking statements, which express the current beliefs and expectations of Company management. Such statements involve a number of known and unknown risks and uncertainties that could cause our future results, performance or achievements to differ significantly from the results, performance or achievements set forth in such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to: our ability to compete successfully with other companies offering competing technologies; the loss of one or more significant customers; consolidation of, and strategic alliances by, our competitors; government regulation; the timing of completion of key project milestones which impact the timing of our revenue recognition; lower demand for key value-added services; our ability to keep pace with advances in technology and to add new features and value-added services; managing lengthy sales cycles; operational risks associated with large projects; our dependence on third party channel partners for a material

portion of our revenues; and other factors discussed under the heading "Risk Factors" in the Company's annual report on Form 20-F filed with the Securities and Exchange Commission. Forward-looking statements in this release are made pursuant to the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
