Allot Communications DDoS Protection Service Helps Secure Catalan Election IT Infrastructure

Allot ServiceProtector provided the real-time network visibility necessary to prevent high-volume attacks at the network edge

HOD HASHARON, Israel, October 8, 2015 /PRNewswire/ --

[Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT) a leading global provider of intelligent broadband solutions that empower communication service providers to optimize and monetize their networks, enterprises to enhance productivity and consumers to improve their digital lifestyle, announced today that The Telecommunications and Information Technology Center of the Generalitat de Catalunya (CTTI) selected Allot to protect Catalonia's September 2015 elections from Distributed Denial of Service (DDoS) cyber-attacks.

CTTI is a public entity created to integrate all of Catalonia's computing and telecommunication services under a single structure. CTTI is responsible for leading the direction, planning, management and control of all the computing systems and the telecommunication services of Generalitat de Catalunya. As the organization managing the IT operations for the September election, CTTI knew that it needed to deploy a security solution that could protect the infrastructure from "hacktivists" looking to disturb the region's political process.

CTTI has been an Allot customer since 2009, first leveraging [Allot Service Gateway](#) to obtain network usage insights to deliver high quality of service (QoS) to various public administration agencies. To prepare for the elections, CTTI deployed [Allot ServiceProtector](#) as a service, a solution designed to detect and block DDoS attacks within seconds, before they have the potential to threaten or interrupt a network service.

Lluís Guillén Cabrera, TIC Services Director from Centre de Telecomunicacions i Tecnologies de la Informació de la Generalitat de Catalunya "I am very satisfied with the protection provided against DDoS attacks by Allot ServiceProtector throughout the critical operations that took place during the past elections, celebrated on Sept 27th in Catalonia, safeguarding our systems against the attacks encountered during that important event and the days prior to the elections".

"Allot worked closely with CTTI to deploy an automated and robust security solution scalable enough to stop even the largest DDoS attacks," said Gary Drutin, Chief Customer Officer, Allot Communications. "By inspecting 100 percent of the network traffic and surgically mitigating threats, Allot was able to ensure that the Catalan elections could operate smoothly and without network disruption."

About Allot Communications

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading global provider of intelligent broadband solutions that put mobile, fixed and cloud networks at the center of the digital lifestyle and workstyle. Allot's DPI-based solutions identify and leverage the business intelligence in data networks, empowering operators to analyze, protect, improve and enrich the digital lifestyle services they deliver. Allot's unique blend of innovative technology, proven know-how and collaborative approach to industry standards and partnerships enables network operators worldwide to elevate their role in the digital lifestyle ecosystem and to open the door to a wealth of new business opportunities.
